SKILLS

Python (NumPy)

Data analysis (Regression
Models)

Visualization (Tableau, Excel)

Analytical Problem Solving

Presentation (Business
Communication)

EDUCATION

BSCS / BACHELOR OF
SCIENCE IN COMPUTER
SCIENCE

MUET, Jamshoro 2021 -
2024

RESUME OBJECTIVE

As a fourth-year BS Computer Science student with a strong proficiency in Python, seeking an ML internship to apply my analytical skills and advance my expertise in machine learning. Committed to leveraging data-driven solutions for real-world challenges.

EXPERIENCE

MOBALYTICS GAMING MARKET RESEARCH – PARAGON ONE

Extern, Data Analytics / October 23, 2023 - Present

- Engaged in comprehensive data analysis to understand the video game landscape.
- Utilized Python for data manipulation, cleaning, and exploratory data analysis.
- Applied regression models to examine correlations among relevant variables.
- Employed Tableau and Excel for visualization techniques to interpret data insights.
- Ongoing development of skills in using analytical results for impactful presentations.

PRESENTATION AT MOBALYTICS EXTERNSHIP – PARAGON ONE

A Strategic Analysis for Mobalytics

- Analyzed characteristics, player profiles, and the overall gaming experience.
- Explored player communities, resources, and the broader ecosystem.
- Summarized player needs and requests for informed decision-making.
- Evaluated the competitive landscape and the business operations of industry giants.
